Health Protection Console

Verified data preview | October 2026 | project snapshot

2023 indicator coverage: 191 countries

Unweighted average UHC service coverage index: 68.2.

Unweighted average out-of-pocket share of health expenditure: 30.6%.

OOP share is not a household hardship or financial-protection rate.

This PDF is a source-backed preview of the corrected analysis.

Indicator quadrant detail

2023; mutually exclusive categories

Quadrant	Countries	Share
Higher UHC / lower OOP share	110	57.6%
Lower UHC / higher OOP share	28	14.7%
Higher UHC / higher OOP share	28	14.7%
Lower UHC / lower OOP share	25	13.1%

Methodology and interpretation

Read alongside README.md and the semantic model measures

UHC is the WHO/World Bank service coverage index (SH_UHC_SCI).

OOP is spending paid out of pocket as a share of current health expenditure.

Quadrant thresholds are portfolio rules: UHC 60 and OOP share 40%.

These labels do not measure catastrophic or impoverishing health spending.

Country averages are unweighted; incomplete country-years are excluded.

The legacy UHC-minus-OOP arithmetic is exploratory, not an official score.
